BORMAN VILLAGE KIDS

Editing your website

The main words and photos on your website can be changed from your WordPress dashboard, without touching any code. This guide walks you through it.

GETTING STARTED

Logging in

Go to **bormanvillagekids.co.nz/wp-admin** and log in with your WordPress.com email and password. You'll land on the dashboard, with a menu down the left side.

While logged in and browsing your own site, a dark admin bar runs across the top. **Edit Page** in that bar jumps you straight to editing the page you're looking at.

REFERENCE

Where things live

Words and photos on a page	**Pages**, click the page name, scroll to the **Page content** box
The homepage's words and photos	**Pages → Home (page content)** — see note below
Site title shown in browser tabs	**Settings → General**

About "Home (page content)": your actual homepage isn't a page you can open and edit directly, it's built from this one. Open it to change the homepage's words and photos — visitors see the real homepage, built using whatever you've entered there.

HOW TO

Changing words on a page

1. **Open the page**
   Go to **Pages** and click the page you want, for example *About Us*.

2. **Find the content box**
   Scroll past the usual title and content area to the **Page content** box. Each editable piece of text or photo has its own field, labelled to match what it is.

3. **Make your changes**
   Click into a text box and type, or click a photo field to remove it and upload a new one.

4. **Save and check**
   Click the blue **Update** button, then **View Page** to see how it looks live.

A few things to know: leave a blank line between paragraphs if a field holds more than one. Photos look best close to the same shape as the one you're replacing — a very differently shaped photo may get cropped oddly. If you leave a field blank, the site just falls back to showing the original text or photo; nothing breaks.

GOOD TO KNOW

What you can't change here

To keep the design and layout working properly, a few things are fixed in the site's code rather than editable fields:

- Navigation menu, buttons, and small labels (like "Kai", section kickers)
- Contact details, opening hours, and social media links in the footer
- The "Enquire" and "Enrolment application" links, which go to your Discover enrolment system
- Colours, fonts, and overall page layout

Need any of these changed? Get in touch with Michelle at Pixly and she'll make the update for you.
